

KALYGO

Bringing Algorand to
the masses

What is Kalygo?

A low-code tool for interacting with
Algorand smart contracts

Problems With Algorand

- Protocol is not widely understood
- High barrier of technical entry for using it's smart contract features
- Algorand's SDK is still maturing

Why Kalygo?

- Team has track record of award-winning development on Algorand and Ethereum
- Lower barrier of entry for leveraging Algorand's smart contract features
- Team has great relationship with top developers in the Algorand ecosystem

The Product

Market

TAM (Feb 2023)

- 24.2% CAGR 2022-2029 projected in the smart contract market
- Algorand is 0.6% of the Smart Contract Market (as of Feb 2023)
- EVM holds 148x more market share than Algorand
- Taking thirdweb's valuation as a reference Kalygo's would be ~\$1,080,000 USD

SAM

2023 Opportunities include...

- GHH4 - 5k ALGO to 20k ALGO
- GHH5 - 5k ALGO to 20k ALGO
- GHH6 - 5k ALGO to 20k ALGO
- QUBIC Labs Grant - \$25k to \$30k
- eMerge Startup Showcase - ?
- eMerge Hackathon - ?

Assuming Kalygo's continued ability to place in competition, short term SAM opportunities are valued on the low end at ~\$27,000 to ~\$40,000 in the next 2 months alone
