KALYGO

Bringing Algorand to the masses

What is Kalygo?

A low-code tool for interacting with Algorand smart contracts

Problems With Algorand

- Protocol is not widely understood

- High barrier of technical entry for using it's smart contract features

- Algorand's SDK is still maturing

Why Kalygo?

- Team has a proven track record of award-winning smart contract development on Algorand and Ethereum
- Is a low-code tool that lowers the barrier of entry for leveraging Algorand's smart contract features
- Team has a strong relationship with top developers in the Algorand ecosystem

Team

Tad Duval
Founder

- 9 yrs work experience as a Software Eng.
- Owns "COMMAND" - a Full-Stack Dev shop incorporated in 2017 - cmdlabs.io
- COMMAND has generated over $400,000 in cash-flow positive revenue to date
- Previous venture in college was a publishing company called Witherberry
- 3rd Place in Algorand BYOP GHH1
- 2nd Place in Algorand BYOP GHH3
